CSC 648/848 SFSU Spring 2017 Milestone 3
Checklist for instructors and teams

03/24/17

This checklist is to be used by instructors and by student teams to record feedback from M3 reviewed meetings. Instructors will fill this out during M3 review. Students should take notes then record the summary in this form and save it for final document submission in M5

Date: 04/17/17   **Team:** 02   **Number of team members present:** 5

Meeting started on time? Yes

<u>Required documentation brought to the meeting</u>? Yes

    -UI screen shots, one per page hard copy
    -M2 revised frozen document

<u>UI prototype (assessment, comments)</u>

-Test main use cases
-Observe layout, flow, clarity, functionality vs. use cases
-Mark comments on hard copy, team to record comments

<u>Vertical product prototype (assessment, comments)</u> – architecture, PHP OO style, coding style, SVN usage and comments, DB schema, adherence to secure best practices (PW encrypted, inputs validated, HTTPS used) etc.

-   Runs from deployment server
-   Github usage
-   Code documented (header, in code) with good coding style
-   MVC/OO patterns followed up
-   Frameworks deployed
-   Database organization
-   Files or Blobs

P1 set of features committed? Team focused only on P1s? No*,*
Team also had one more feature from P2, which is Add to WatchList. But will be dropping that for now.

Teamwork: **is the team working out, any related issues:** Yes

Risks: **all <u>actual</u>**
– list them and develop strategy to mitigate them

Coding practices and style: Yes
-Coding style adopted, code documented (header, in code)

Adherence to best practices of security (PW encrypted, inputs verified, (HTTPS not required since we do not have sec. cert for now)

Yes

Usage of proper SE code management practices including using only approved tools: Yes

Usage of github: Yes.
-Comments on positing
-Number of posting to github
-Appr. even distribution of submissions among team members (check github post stats for all members

Postings were done from the server to GitHub. This caused inaccurate representation of number of commits on GitHub. To fix this, the server email IDs will be added to respective GitHub accounts.

Digital content **(e.g. images, video) please provide information on status and availability, chosen formats, resolution etc.**
Yes

Status of github and AWS server: Okay

<u>**Comments and checkpoints (if any)**</u>
1. To change to UI of welcome page.
2. Make better use of the available real estate
3. Rearrange the buttons on the nav bar of welcome page.
4. Rearrange the input field on the add listings page.
5. Rearrange the display fields on the details page.
6. Combine Buyers Messages and Messages tab.
